

MIROAD RUBBER

Rubber surfaces for
play, sport and leisure

Miroad

the new one stop shop
for play, sports and
leisure surfacing

With an excellent reputation for product quality and an amazing range of vibrant colours in its portfolio, Miroad can supply you with the components for many different types of internal and external surfacing installations including:

Playgrounds
Climbing walls
Theme parks
Recreational areas
Sports courts
Gymnasia
Pro shops and sports stores

Football pitches
Running tracks
Swimming pool surrounds
Equestrian installations
Rubber infill for artificial grass
Rubber walkways and driveways
Shooting ranges

In addition to tiles and pavers made from recycled rubber, Miroad offers 19 colours of EPDM granulate. Our granulate is in stock NOW in our UK warehouse for immediate delivery.

Technical support

From our extensive knowledge of the surfacing industry, we are delighted to offer you free, impartial advice to help you identify the best surfacing solution for your installation. Do not hesitate to call or email us for a chat.

EPDM Granules

For wetpour installations -
the best colour range, the
best quality, the best prices

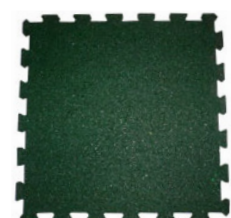

In 19 vibrant colours. All our colours are peroxide cured for superior colour stability & uv resistance. High polymer content for extra durability. UK stocks held for immediate delivery.

STANDARDS		BRIGHTS		SPECIALS
				
RED	GOLDEN YELLOW	GREEN	LIGHT GREEN	PINK
				
BROWN	LIGHT BROWN	BLUE	LIGHT BLUE	PURPLE
				
GREY	LIGHT GREY	ORANGE	YELLOW	ROSE RED
				
IVORY	GRASS GREEN	WHITE	NAVY BLUE	

ALL AVAILABLE FROM OUR UK STOCK FOR IMMEDIATE DELIVERY

Our granulate comes in 25kg bags on 1 tonne pallets. No minimum order. We also have our own PU binder in stock in 20kg and 220kg drums.

It can be laid on a suitably prepared base or using our time and labour saving base layer mats as shown.

Rubber tiles

Impact absorbing
playground tiles in two
formats and six colours

Classic safety tiles

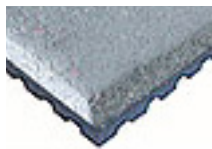

Thick shock-absorbent dual layer tiles made from recycled rubber, ideal for playgrounds and climbing walls. Designed to cushion and absorb the impact of falls, reducing the risk of injury. Available in 25mm to 110mm thickness in line with the critical fall height requirements for your installation. Tiles are square (500mm x 500mm) or hexagonal (300mm or 500mm hexagon).

Colours

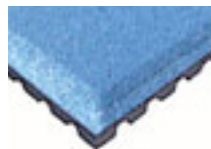

Six pigmented colours

BLACK

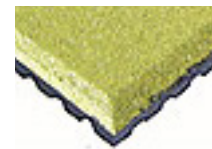

GREY

BLUE

GREEN

YELLOW

RED

Also available in any of our EPDM colour range

Standards

Our square tiles conform to the following safety standards.

For full results contact us.

BS7188 : 1989 (section 6) ease of ignition
BS7188 : 1989 (section 4) skid resistance
ISO4662 : 1986 rebound resilience

DIN 53571 : 1971 tensile stress-strain properties
DIN EN 1177 : 2002-03-Impact attenuation
ASTM F1292: 1999 impact attenuation (free fall test method)

We also have many ranges of patterned tiles to create a bright playground environment. Contact us for more information.

Playground graphics tiles

Enhance play value with our custom made prebonded graphics to add a new dimension to the play experience.

Prebonded graphics inset into a square tile. You choose your own tile size and colour combinations. We can make tiles in any of the colours in our EPDM granulate range, shown on p3. If you are in a hurry we sometimes holds stocks of certain designs – just ask. To order your graphics tiles, select your graphic from the ranges below. Select the colours for each graphic. Select the colour for the outer tile. Specify your tile size (500mm or 1000mm square). And finally specify quantities for each design.

Rubber mats

Versatile mats for play, fitness and event installations

Interlock mats

Soft, resilient dual layer mats are a great alternative for indoor fitness as well as playgrounds, or for portable applications such as exhibition flooring. Fast installation and easy tile replacement.

Colours

- Six pigmented colours (see the square tile colour chart)
- Black with terrazzo style colour speckling using EPDM granules in 10%, 30% or 50% density.
- Also available in any of our EPDM colour range.

Standards

Our interlock tiles conform to the following safety standards.

For full results contact us.

BS7188 : 1989 (section 6) ease of ignition

BS7188 : 1989 (section 4) skid resistance

ISO4662 : 1986 rebound resilience

DIN 53571 : 1971 tensile stress-strain properties

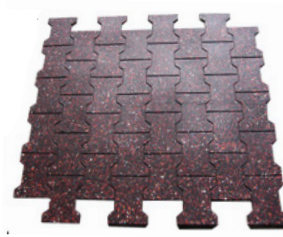

DIN EN 1177 : 2002-03-Impact attenuation

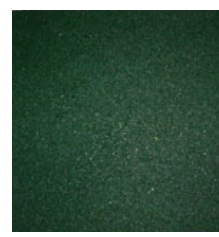

V-Interlock mats
500mm x 500mm
10mm and 15mm thickness

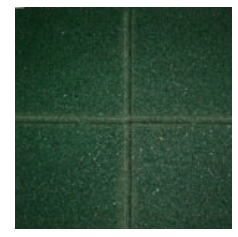

Big V-Interlock mats
1050mm x 1050mm
18mm thickness

40 I-Lock mats
1145mm x 1100mm
10mm thickness

Square tile
1000mm x 1000mm
10mm and 15mm
thickness

Square cross tile
1000mm x 1000mm
10mm and 15mm
thickness

Rubber pavers

In a range of formats for heavy traffic areas

Our range of paving blocks are suitable for heavy traffic areas that require high safety standards and exceptional durability. Ideal for racecourse paddocks and walkways too. Fast and easy installation over existing sand, asphalt or concrete pavements. Dual layer construction in a variety of shapes. Ideal for walkways, driveways and recreation areas. Up to 45mm thickness according to requirement.

Colours

- Six pigmented colours (see the square tile colour chart)
- Black with terrazzo style colour speckling using EPDM granules in 10%, 30% or 50% density.
- Also available in any of our EPDM colour range.

You can mix and match paver block colours to create your own custom design.

Rectangle paver

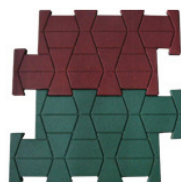

220mm x 110mm
45mm thickness

H-paver

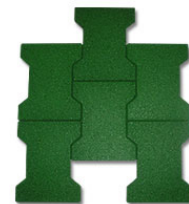

304mm x 304mm
25mm and 45mm
thickness

6-H paver

910mm x 528mm
45mm thickness

I paver

220mm x 250mm
20mm 40mm and
45mm thickness

Z paver

225mm x 115mm
45mm thickness

Shooting blocks and dogbone pavers also available
